

Input from African youth in 15 countries and 50 organisations

on Denmark's strategic plan on its engagement with African countries

**Equal partnerships *with and between* youth and
youth-led organisations is a precondition for
stronger ties between our continents -
now and in the future**

We are dedicated and progressive partners to Denmark:

- We mobilize and empower youth in communities across the continent
- We take the lead and catalyze change
- We give and amplify youth voices in decision making processes

We encourage Denmark to work with us to meet the top priorities of youth in communities across the continent:

- Empowerment and opportunities to engage in society
- Eco-friendly and green solutions
- Inclusive and up-to-date quality education linking to decent work and viable entrepreneurship opportunities
- Meaningful, decent and democratic lives beyond basic needs
- Accessible and affordable quality health care
- A voice in decision making processes and opportunity to exercise rights
- Inclusion for young women, girls and persons with disabilities
